WORK EXPERIENCE

Abuissalancers - Web Developer

November 2024 – current   Full remote

- Contributed to the development of an insurance platform using React and TypeScript, building 9 pages and implementing JWT authentication and form validation.
- Integrated APIs with back-end developers and connected the website to a dashboard via WebSocket for live updates.
- Organized website navigation and routes, adding loading and waiting states for users during admin approval/rejection.
- Worked on a project for a software and AI company, building half of the website's 29 pages and ensuring 100% design accuracy.
- Delivered tasks ahead of schedule, helping the company meet client deadlines and exceed expectations.

Freelancer – Frontend Developer

April 2021 - November 2024   Egypt

- Delivered large projects ahead of deadlines, meeting client requirements, and using specified technologies.
- Worked with pre-designed Figma templates and built projects from scratch.
- Developed multilingual, multi-role dashboards with features like authentication, data export to PDF, and protected routes.
- Built a full website for a healthcare company with features for booking consultations, contacting the company, and displaying its location on a map.
